

**KRONEN
HANSA**

YOUR TRUST IS OUR INCENTIVE

Since 1825

Design ▪ Mould Construction ▪ Injection Moulding ▪ Assembly

AN OVERVIEW

DEVELOPMENT

The roots of Kronen-Hansa-Werk go back to the founding year of 1825. In the course of time, the company's work was again and again adjusted to the technology development and changes on the market.

Today products made of PUR foam, injection moulded parts and moulds for injection moulding are being fabricated.

STRONG PERFORMANCE

In addition to a range of tools for craftsmen that is delivered to more than 40 countries, we supply renowned customers from the industry with plastic parts.

Of course, our services include everything from plastics-compatible product development through mould construction to manufacturing.

GREAT DIVERSITY

Our product range also covers a broad range of applications including, amongst other things, medical technology, automotive industry, heating and ventilation.

Today, we produce on an area of 22,000 m² and a hall area of 12,000 m².

EQUIPMENT

Our modern machinery includes injection moulding machines with a closing force of 25 to 500 t. We also perform downstream processing steps such as printing or mounting of subassemblies.

We control and document the entire process chain with our SYNCOS CAQ system, the NAVISION ERP-system and the PROSES production data recording system, and are certified to DIN EN ISO 9001:2008.

OUR SERVICES AT A GLANCE

- Consulting
- Development
- Design
- Final assembly
- Mould construction
- Quality assurance

Your trust is our incentive

ABOUT US

Quality-consciousness and plenty of experience are the basis of our success.

Therefore, the name of Kronen Hansa has represented high-quality top tools since 1825, all over Germany and Europe. We promise that we will keep it this way! Our goal is to remain your reliable partner for masonry and tiling expertise in future as well.

We have also made a name for ourselves as a competent partner for plastic moulded parts in the last few years. Kronen-Hansa-Werk GmbH & Co. KG provides everything from unconventional development through cost-effective mould construction to process-secure production of plastic moulded parts.

In this process, maximum quality and outstanding consumer benefit are the result of intensive dialogue with users and trade partners. Our inhouse tool construction is indispensable for the high quality of our products.

There for you since 1825

THE CHRONICLE

- 2011 Taking over the knee protector and tool programme of KWM + Kaul
- 2006 Outsourcing of the section of painters' tools into Kronen GmbH, Wangen in the Allgäu
- 2000 New construction of a production hall for mould construction
- 1997 Integration of E. Jung oHG Metallwerkzeuge
- 1989 Merger of 'Kronen-Pinsel' and 'Hansaform' into Kronen-Hansa-Werk GmbH & Co. KG
- 1988 Expansion of production sites with additional halls and buildings
- 1979 New construction of a large storage hall
- 1960 Commencement of the production of paint rollers, global sales of the Kronen paintbrush
- 1861 Start of paintbrush and brush production
- 1825 Foundation of a pen manufacturer by the Krogmann brothers in Lohne, exporting to many European countries

We are where you need us

INTERNATIONAL

Our products are now sold not only in Europe but all over the globe. Many of our customers are situated in the following countries:

- | | | |
|----------------|---------------|-----------------|
| ■ Australia | ■ Croatia | ■ Hungary |
| ■ Italy | ■ Sweden | ■ Great Britain |
| ■ Saudi Arabia | ■ Finland | ■ Austria |
| ■ Belgium | ■ New Zealand | ■ USA |
| ■ Japan | ■ Turkey | ■ India |
| ■ Spain | ■ France | ■ Poland |
| ■ China | ■ Netherlands | ■ Ireland |
| ■ Canada | ■ Ukraine | ■ Russia |
| ■ Switzerland | ■ Greece | |
| ■ Denmark | ■ Norway | |

FROM CONCEPT TO PRODUCTION

DEVELOPMENT

We will develop your idea in a plastics-compatible manner. We offer individual and personal consulting from development of the tool to process-secure production of parts in large quantities.

Of course, we will already check process security and parts quality in the development phase.

DESIGN

As a competent partner, we are the specialist for CAD/CAM-supported design of your drafts or sketches.

Downstream processing, such as printing and painting, as well as assembly of parts, is no problem for us either.

- Fast and individual development
- CAD/CAM-supported
- Very fast production of prototype tools or functional STL parts
- Product-optimisation at the earliest stage
- Complete tool design in 2D and 3D

© Arburg

INJECTION MOULDING

We work with modern machinery in the area of injection moulding. At closing forces of 25 to 500 t, shot weights of 5 g to 5,000 g are possible. We process almost any common materials.

- Thermoplastic injection moulding
- 2-component injection moulding
- 2 rotary turret machines
- Thermoplastic foam casting process

FINAL ASSEMBLY

- Paint-finishing of parts
- Printing of parts
- Completion with screws or bushings
- Individual packaging of products
- Completion of complex subassemblies

THE PRODUCT RANGE

Our product range is diversified at various levels and covers miscellaneous fields. In addition to our high-quality construction tools, we also serve the automotive industry and medical applications.

Our long experience enables us to develop products that suit the needs of our customers.

TECHNICAL PLASTIC INJECTION MOULDING

AUTOMOTIVE INDUSTRY

- Covers (engine compartment)
- Middle housing of plastic
- Paint-finishing device
- Oil filter components
- Valve body

IRRIGATION & DRAINAGE

- Floor drain systems
- Drain traps
- Backwater valves
- Front/pour-in walls
- Locks

HEATING & VENTING

- Operating unit holder
- Spacer sleeves
- Housings
- Cable covers
- Frame for air heaters
- Final assembly & inspection

MEDICAL TECHNOLOGY

- Rechargeable battery housings
- Oxygen masks
- Defibrillator housings
- Fan propellers
- Sleep therapy housings
- Final assembly & inspections

We rely on quality

CONSTRUCTION TOOLS

What started with a paintbrush range has in the meantime become a comprehensive range of many different construction tools. It consists of different types of smoothing trowels, tile washing boards, knee protectors, floats, knee boards and various tile washing sets.

Our customers also appreciate the high quality of the products represented in international trade as well.

PRODUCTS

- Smoothing trowels
- Plaster jars
- Tile joint boards
- Tile washing sets
- Tiling tools
- Plastic hammers
- Silicone tools
- Floats
